Showcase for Anthropic · Product Marketing Lead, GTM Strategy – Claude for Knowledge Work:
ericbeer.me/showcase/anthropic-knowledge-work

SUMMARY

Entrepreneur and performance marketer with 20+ years building and scaling customer-acquisition businesses, with $100M+ in affiliate commissions generated across a career in lead generation and affiliate marketing. Now builds AI-driven products end to end, from strategy and data architecture to launch, having shipped 50+ apps across lead generation, recruiting tech, traffic and content tools, and local-business automation. Strongest at turning a market insight into a working system: product vision, monetization model, partner economics, and the playbooks that let a team run it. Currently completing AI certifications.

EXPERIENCE

Founder — LeadQual.ai (Lumenix LLC) — Present

AI-powered lead qualification and routing platform connecting publishers and advertisers through AI voice agents and warm transfers.

- Designed the platform's core model: publisher leads qualified by Retell AI voice agents, then warm-transferred to advertisers, with a defined revenue split and broker economics.
- Led a full product redesign: collapsed navigation from 14 to 6 items, folded standalone offers into campaigns, built a 5-step campaign wizard and a unified routing engine, and redesigned the data model.
- Architected a phased plan for a high-volume client processing 300–400K records per day using BullMQ queuing, DID rotation, and Numeracle caller reputation.
- Built the partner legal suite (publisher, advertiser, and broker agreements and insertion orders) with TCPA/CCPA, TrustedForm, and PEWC protections; negotiated counter-redlines with partners including SHIFT44.
- Running live campaigns in Medicare, Mortgage Assistance, and Final Expense; built a 200+ company outreach list across 11 verticals.

Founder — BeChosen.ai and Scout AI Job Hunter — Present

Job platform aggregating openings from 8 ATS platforms (Greenhouse, Lever, Ashby, SmartRecruiters, Workday, iCIMS, Oracle Recruiting, SAP SuccessFactors), with Scout, an AI agent that matches, tailors, applies, and tracks applications; available as a connector inside Claude and ChatGPT.

- Defined product strategy and pricing for Scout's membership and All-Access tiers.
- Led a full audit of ATS discovery and job ingestion, producing a gap analysis and phased remediation backlog.
- Designed a company-discovery crawler and a university-major prioritization model to surface employers most relevant to students.
- Built a creator-led acquisition program and a TikTok Shop storefront funnel feeding subscriptions.

Founder — Performance Marketer (Performance Marketer LLC) — Present

Trademarked umbrella brand and distribution hub for marketing education and tools.

- Built a single opt-in hub, the Performance Marketer Weekly newsletter (Beehiiv), and ManyChat comment automation.
- Created AffiliateSchool.ai, an education ecosystem with 17 digital products, a 7-stage capstone simulation, a 12-module Skool community, and a 5-level partner commission structure.
- Developed the proprietary 3W Framework (What, Who, Where) and the Find → Contact → Activate → Scale method used across courses and tools, including the GetFacey.ai traffic-discovery platform.

Operator — JVC Affiliate Network — Present

- Run an affiliate network on Everflow; built affiliate-manager playbooks, outreach systems, and a 280+ affiliate tracking workbook.

Founder & CEO — Universal Marketing Partners

- Built an 8-figure performance and affiliate marketing business, part of a track record of multiple 7-, 8- and 9-figure online businesses.
- Ran lead generation and affiliate campaigns on a pay-for-results model with measurable ROI for partners.

- Agency of record for RealAge.com (Hearst / Dr. Oz) and Harlequin Book Club; drove memberships for Disney Book Club; drove customers for LifeLock, Norton and Credit Sesame; scaled a language-learning product from under $10M to over $100M market cap via Facebook arbitrage.

Additional ventures

- AllDayLong and RapidDispatch AI: AI answering and emergency-dispatch products for small businesses, with dashboards, sales collateral, and a remote PhoneBurner sales floor.
- AI trading system: co-building a Claude-powered trading bot that encodes a Wall Street trader's rules (50/50 partnership).
- Consumer apps (Talk, Knock, Chapters): built an agent pipeline to produce product docs and take three iOS apps to the App Store.
- Sports collectibles concept: designed a closed-loop fan ecosystem pitch with two prototype apps for a major collectibles company; filed a provisional patent covering 16 inventions (2026).

SKILLS

Growth: performance marketing, affiliate and lead generation, partner programs, funnel and offer design, creator marketing
Product: product strategy, pricing and monetization, platform architecture, requirements and specs
AI and build: AI agents and voice AI (Retell), Claude, Replit, rapid prototyping
Operations: partner contracts and negotiation, compliance (TCPA, CCPA), sales-floor setup

PUBLICATIONS & MEDIA

- Co-author, Million Dollar Dads
- Co-author, Million Dollar Identity
- Host, Performance Marketer Podcast (2019–2023), 125+ episodes
- Creator, Eric Beer YouTube channel (@ericbeer), teaching affiliate program building, lead generation, and performance-based growth

EDUCATION

University of Maryland, College Park — Finance, 1999

- Scholarship athlete, Maryland Terrapins baseball (NCAA Division I, ACC); senior outfielder

ATHLETICS

- Selected to the 1993 USA Junior Olympic baseball team, one of 64 players nationally, in a class that included future MLB players Alex Rodriguez and Scott Rolen
